

GPFA-Series Pleated All-Fluoropolymer PTFE/PFA

GPFA-Series High Purity All-Fluoropolymer Filter Cartridges provide superior chemical compatibility, temperature range, and ultra-low extractables for the most demanding needs of the microelectronics industry. Ideal for aggressive “wet-etch and clean” applications. The PTFE membrane offers high flow rates at low pressure drop, while the ultra-pure perfluoralkyl (PFA) hardware exhibits superior chemical resistance and high temperature tolerance. Minimized ionic and TOC extractables are attained through a specialized UPW flush process. Wetpacking option is available for ease of wetting in aqueous applications. Available in the full range of micron ratings to suit all applications.
